

APPLICATION OF THE **ORIGAMITEK** TECHNOLOGY FOR OBTAINING OF FOOD **FARMING-DOMES** - Homes that produce food

A new Green Technology generation. Homes with optimization of **arable spaces** in minimum areas that provide food to its inhabitants throughout the year, suitable for all climates and adaptable to all soil types.

Endless design possibilities, from minimum clearances for low income housing to big recreational countryside dwellings in rural areas.

A new concept of dwellings that convert all of the terrain into a 100% growing space that can accelerate its productivity through automated hydroponic irrigation.
